

Guidance Course on

“Capacity Building as Energy Manager / Auditor”

Mahratta Chamber of Commerce, Industries and Agriculture is a premier regional Chamber of Commerce working for the development of trade, industry, commerce and agriculture in the region for seven decades by providing a common platform. MCCIA has been taking efforts to provide quality knowledge to the business community in a wide variety of areas.

Background

The Bureau of Energy Efficiency, Govt. of India has initiated various promotional and mandatory provisions of the Energy Conservation Act. On the mandatory provisions front, Energy Managers and Energy Auditors capacity is being developed through successfully conducting certification examinations. The essential qualification for a Certified Energy Manager and Certified Energy Auditor would be the passing of a National Level Certification Examination, which will be conducted under the aegis of Bureau of Energy Efficiency which will establish a uniform criterion for the certification of energy managers / energy auditors. This will also ensure that services of qualified persons, having the requisite knowledge on the subject, are available to the industry. The tenth examination is scheduled by May 10.

MCCIA had taken the initiative to start the guidance course with the objective to generate in-house expertise in the industry. Last year, 67 % of the participants who appeared passed the Energy Auditor Exam successfully. This year also we are pleased to commence this course from 8 th Feb 10.

It is the appropriate time for the industries to take the advantage of the course and to look in to the efficient operations and energy conservation to reduce energy bill in long run.
